

Onboarda Compliance Report — PR4 Monitoring Automation Smoke 7f861903 Ltd

Application Reference	ARF-PR4-AUTO-7f861903	Entity Name	PR4 Monitoring Automation Smoke 7f861903 Ltd
Country of Incorporation	Mauritius	Sector	Technology
Entity Type	SME	Risk Rating	LOW
Authoritative Case Risk Score	25/100	Confidence	60.0%
Risk Calculated At	2026-06-06 17:01:08.427389	Memo Generated At	2026-06-14T08:14:33.596077+00:00
Decision	ESCALATE TO EDD		
Memo Version	v1	PDF Generated	2026-06-14 08:15:16 UTC

1. Executive Summary

PR4 Monitoring Automation Smoke 7f861903 Ltd (ARF-PR4-AUTO-7f861903) is assessed as HIGH risk with score 25/100. Recommendation: ESCALATE TO EDD. Screening position: Sanctions screening status: PENDING — required screening has not yet returned a terminal provider result. Not recommended for approval while screening remains unresolved. Approval readiness: NOT READY. Primary blockers: Screening is not terminal / not approval-ready; screening:not_terminal; 1 document(s) outstanding: passport. Required next action: Complete live terminal screening and regenerate/revalidate this memo. Model confidence: 60%.

2. Client Overview

Entity: PR4 Monitoring Automation Smoke 7f861903 Ltd. BRN: not provided. Jurisdiction: Mauritius. Entity type: SME. Sector: Technology. Business activity: Information not provided. Source of funds: Information not provided. Expected volume: Information not provided.

3. Ownership & Control

The entity has 0 director(s) and 0 UBO(s). Ownership risk rating: HIGH based on no UBO information provided — critical data gap; effective control cannot be clearly determined. Structure complexity: Simple. Ownership/control data gaps remain and prevent full assurance.

Structure Complexity: Simple

Control Assessment: Effective control cannot be fully determined from current ownership data.

4. Risk Assessment

Composite position: HIGH; recorded score: 25. Key risk-increasing factors: Documentation gap: 1 outstanding item(s); Screening dependency remains unresolved; Ownership risk: HIGH - no UBO information provided — critical data gap; effective control cannot be clearly determined; Limited trading history reduces forward-looking confidence. Key risk-reducing factors: No declared/detected PEP exposure among directors or UBOs; Low sector risk - Technology does not exhibit elevated ML/TF typology indicators.

Risk Dimension	Rating	Assessment
Jurisdiction Risk	MEDIUM	Mauritius: rating based on jurisdiction and operating-country evidence.
Business Risk	LOW	Technology: rating based on sector typology and stated business activity.
Transaction Risk	LOW	Transaction risk rating based on expected volume: Information not provided.
Ownership Risk	HIGH	Ownership risk rating based on no UBO information provided — critical data gap; effective control cannot be clearly determined.
Financial Crime Risk	LOW	Deterministic financial-crime rating: LOW. Adverse Media Screening: NOT COMPLETE — coverage is none; no clean adverse-media conclusion is recorded until an approved provider returns terminal coverage. Screening state: Not terminal / approval blocked.

5. Screening Results

Screening status: Not terminal / approval blocked. Canonical state: pending; provider mode: pending. Approval is blocked by screening until live terminal screening is completed, defensible clearance exists, and this memo is regenerated/revalidated. No clean/no-match reliance is available until screening reaches a terminal, defensible state. no clean adverse-media conclusion is recorded. no rationale recorded Adverse media: Adverse media review NOT complete — clean adverse-media reliance is unavailable.

6. Document Verification

1 document(s) submitted; 0 verified; 1 outstanding. Professional judgement: outstanding documents prevent complete assurance and must be resolved. Overall documentation adequacy: 0%. Pending items: passport.

7. Onboarding Enhanced Review

Onboarding Enhanced Review: Not triggered based on the current application data and available routing information.

8. AI Explainability Layer

Rule/model source: Onboarda Composite Risk Engine with deterministic memo controls. Overall risk score: 25/100. Confidence: 60%. Default memo shows only the material factors and limitations; detailed rule evidence is retained in the appendix. Limitations: screening or document gaps must be resolved before approval reliance where listed as blockers.

Risk-Increasing Factors

- **Documentation gap: 1 outstanding item(s)**
- **Screening dependency remains unresolved**
- **Ownership risk: HIGH - no UBO information provided — critical data gap; effective control cannot be clearly determined**
- **Limited trading history reduces forward-looking confidence**

Risk-Decreasing Factors

- No declared/detected PEP exposure among directors or UBOs
- Low sector risk - Technology does not exhibit elevated ML/TF typology indicators

9. Red Flags & Mitigants

Red Flags Identified

- **Screening is not approval-ready; No clean/no-match reliance is available until screening reaches a terminal, defensible state**
- **Documentation gap: 1 of 1 document(s) remain outstanding**
- **Limited trading history; no historical transaction data is available for benchmark testing**

Mitigating Factors

- Transaction monitoring will be applied after onboarding decision

10. Compliance Decision

Recommendation: **ESCALATE TO EDD**

Recommendation: ESCALATE_TO_EDD. Enhanced Due Diligence before any approval is required. Conditional approval is not available while approval-blocking items remain. Decision rationale: screening resolution is the controlling next step.

11. Ongoing Monitoring & Review

Next action: Complete live terminal screening and regenerate/revalidate this memo. Monitoring tier after onboarding decision: Enhanced. Monitoring dependencies: ownership changes, adverse-media alerts, PEP status changes, transaction drift, and document non-compliance.

12. Audit & Governance

Source attribution, rule-engine evidence, validation result, supervisor result, quality caps, and generation timestamp are retained. Generated: 2026-06-14T08:14:33.592602. Full pre-cleanup evidence sections are retained in appendix_sections for audit/export review.

Appendix Evidence Index

Full pre-cleanup section detail is retained in the memo export payload as **appendix_sections**. The default PDF remains decision-first and lists the retained evidence below.
