1. Executive Summary

Coral Bay Holdings Ltd (ARF-2026-DEMO02) is assessed as HIGH risk with score 55/100. Recommendation: ESCALATE TO EDD. Screening position: Sanctions screening status: PENDING — required screening has not yet returned a terminal provider result. Not recommended for approval while screening remains unresolved. Approval readiness: NOT READY. Primary blockers: Screening is not terminal / not approval-ready; screening:not_terminal; 1 document(s) outstanding: financial_statements. Required next action: Complete live terminal screening and regenerate/revalidate this memo. Model confidence: 78%.

2. Client Overview

Entity: Coral Bay Holdings Ltd. BRN: GBL2-2024-0731. Jurisdiction: Mauritius. Entity type: Global Business Company. Sector: Financial Services. Business activity: Information not provided. Source of funds: Investment returns and management fees from portfolio companies. Expected volume: USD 250,000 monthly.

3. Ownership & Control

The entity has 3 director(s) and 3 UBO(s). Directors: Raj Naidoo, Fatima Al-Rashid, Pierre Leclerc. UBOs: Raj Naidoo, Fatima Al-Rashid, Coral Bay Trust (Pierre Leclerc, Settlor). Ownership risk rating: LOW based on ownership structure remains opaque or complex based on structure/disclosure indicators. Structure complexity: Layered. Control owner: Raj Naidoo (45.0%); ownership transparency remains opaque.

Structure Complexity: Layered

Control Assessment: Disclosed UBO/control data identifies Raj Naidoo (45.0%), but ownership transparency remains opaque.

4. Risk Assessment

Canonical risk rating: HIGH; recorded score: 55. Key risk-increasing factors: Documentation gap: 1 outstanding item(s); Screening dependency remains unresolved; Limited trading history reduces forward-looking confidence. Key risk-reducing factors: No declared/detected PEP exposure among directors or UBOs.

Risk Dimension	Rating	Assessment
Jurisdiction Risk	MEDIUM	Mauritius: rating based on jurisdiction and operating-country evidence.
Business Risk	MEDIUM	Financial Services: rating based on sector typology and stated business activity.
Transaction Risk	HIGH	Transaction risk rating based on expected volume: USD 250,000 monthly.
Ownership Risk	LOW	Ownership risk rating based on ownership structure remains opaque or complex based on structure/disclosure indicators.
Financial Crime Risk	LOW	Deterministic financial-crime rating: LOW. Adverse Media Screening: NOT COMPLETE — coverage is none; no clean adverse-media conclusion is recorded until an approved provider returns terminal coverage. Screening state: Not terminal / approval blocked.

5. Screening Results

Screening status: Not terminal / approval blocked. Canonical state: pending; provider mode: pending. Approval is blocked by screening until live terminal screening is completed, defensible clearance exists, and this memo is regenerated/revalidated. No clean/no-match reliance is available until screening reaches a terminal, defensible state. no clean adverse-media conclusion is recorded. no rationale recorded Adverse media: Adverse media review NOT complete — clean adverse-media reliance is unavailable.

6. Document Verification

6 document(s) submitted; 5 verified; 1 outstanding. Professional judgement: outstanding documents prevent complete assurance and must be resolved. Overall documentation adequacy: 83%. Pending items: financial_statements.

7. Onboarding Enhanced Review

Onboarding Enhanced Review: Not triggered based on the current application data and available routing information.

8. AI Explainability Layer

Rule/model source: RegMind Composite Risk Engine with deterministic memo controls. Overall risk score: 55/100. Confidence: 78%. Default memo shows only the material factors and limitations; detailed rule evidence is retained in the appendix. Limitations: screening or document gaps must be resolved before approval reliance where listed as blockers.

Risk-Increasing Factors

- **Documentation gap: 1 outstanding item(s)**
- **Screening dependency remains unresolved**
- **Limited trading history reduces forward-looking confidence**

Risk-Decreasing Factors

- **No declared/detected PEP exposure among directors or UBOs**

9. Red Flags & Mitigants

Red Flags Identified

- **Screening is not approval-ready; No clean/no-match reliance is available until screening reaches a terminal, defensible state**
- **Documentation gap: 1 of 6 document(s) remain outstanding**
- **Limited trading history; no historical transaction data is available for benchmark testing**

Mitigating Factors

- **5 of 6 document(s) verified at 83% confidence**
- **Transaction monitoring will be applied after onboarding decision**

10. Compliance Decision

Recommendation: **ESCALATE TO EDD**

Recommendation: ESCALATE_TO_EDD. Enhanced Due Diligence before any approval is required. Conditional approval is not available while approval-blocking items remain. Decision rationale: screening resolution is the controlling next step.

11. Ongoing Monitoring & Review

Next action: Complete live terminal screening and regenerate/revalidate this memo. Monitoring tier after onboarding decision: Enhanced. Monitoring dependencies: ownership changes, adverse-media alerts, PEP status changes, transaction drift, and document non-compliance.

12. Audit & Governance

Source attribution, rule-engine evidence, validation result, supervisor result, quality caps, and generation timestamp are retained. Generated: 2026-07-26T15:55:24.083169. Full pre-cleanup evidence sections are retained in appendix_sections for audit/export review.

Appendix Evidence Index

Full pre-cleanup section detail is retained in the memo export payload as **appendix_sections**. The default PDF remains decision-first and lists the retained evidence below.
