

RegMind Compliance Memorandum - Meridian Trade Technologies Ltd

FINAL - APPROVED / LOCKED

1. Document Control

Entity name	Meridian Trade Technologies Ltd	Application reference	ARF-2026-VAL-001
Memo version	v2	Document status	FINAL - APPROVED / LOCKED
Generated timestamp	2026-07-31 10:15 UTC	Application snapshot timestamp	2026-07-31 10:12 UTC
Risk model version	risk-model-v1.1	RISK CLASSIFICATION Medium	AUTHORITATIVE RISK SCORE 47/100
Screening snapshot	clear no confirmed matches; provider mode: live; captured: 2026-07-31 10:10 UTC		

2. Memo Basis

This compliance opinion has been prepared using:

- Current Application Profile
- Current Document Verification Status
- Current Risk Assessment
- Current Enhanced Review Status
- Current Screening Snapshot

This memo reflects the application state at the generation timestamp. Subsequent material changes require a new memo version.

3. Compliance Opinion

RECOMMENDATION

Approve with Conditions

On the evidence available at the application snapshot, the appropriate recommendation is to approve Meridian Trade Technologies Ltd subject to conditions. The ownership structure is transparent: the sole beneficial owner and controlling director are identified and verified, and the declared activity is consistent with the corporate evidence and expected payment profile. Current screening records no confirmed sanctions, PEP or adverse-media matches. Residual exposure arises from higher-risk cross-border trade corridors and the company's limited operating history. Those factors warrant control but are moderated by verified ownership, a credible funding profile and documented commercial purpose. Receipt of the outstanding bank reference before activation, enhanced first-year monitoring and an early transaction review address the identified exposure proportionately. Approval with conditions therefore reflects the evidence, maintains appropriate control at activation and supports effective ongoing oversight.

4. Decision Rationale

Ownership is acceptable because the sole beneficial owner and controlling director are consistently identified and verified, with no unexplained control layer. Current screening records no confirmed sanctions, PEP or adverse-media matches. Cross-border exposure and limited trading history retain a medium residual risk, but evidenced activity and a credible funding profile keep that risk within appetite. Requiring the bank reference before activation and enhanced first-year monitoring makes conditional approval proportionate.

5. Material Concerns and Mitigating Factors

Material concerns

- Cross-border supplier payments include two higher-risk trade corridors.
- The operating company has fewer than three years of trading history.

Mitigating factors

- The 100% beneficial owner and controlling director are identified and verified.
- No confirmed sanctions, PEP or adverse-media matches are recorded in the screening snapshot.
- Expected payment activity is supported by contracts and management accounts.

6. Conditions Before Approval

Mandatory Conditions

1. Obtain the outstanding certified bank reference before account activation.

Operational Conditions

1. Record acceptance of the enhanced first-year transaction monitoring profile.

7. Residual Risk and Monitoring Position

Residual risk: Residual risk is MEDIUM. The primary drivers are cross-border trade exposure and a recently established operating history; transparent ownership, verified corporate evidence and a credible funding profile reduce the assessed risk.

Monitoring position: Apply the medium-risk monitoring profile, review cross-border transaction patterns after 90 days, and complete the first periodic KYC review within 12 months.

Risk calculated at: 2026-07-31 10:11 UTC

8. Officer Decision and Sign-Off

Decision status	FINAL - APPROVED / LOCKED
Officer	Senior Compliance Officer
Decision timestamp	2026-07-31 11:02 UTC
Lock status	Locked - new evidence requires a new memo version

OFFICER RATIONALE - PROFESSIONAL JUDGEMENT

I have reviewed the ownership evidence, current screening snapshot, residual risk position and proposed controls. The recommendation is proportionate to the identified exposure. Approval is granted subject to receipt of the certified bank reference before activation and implementation of the enhanced first-year monitoring profile.

9. Audit and Governance Metadata

Memo content hash	55f0091fe8c4a9a8
